Adjustable Filler Tube

Model C001

FEATURES

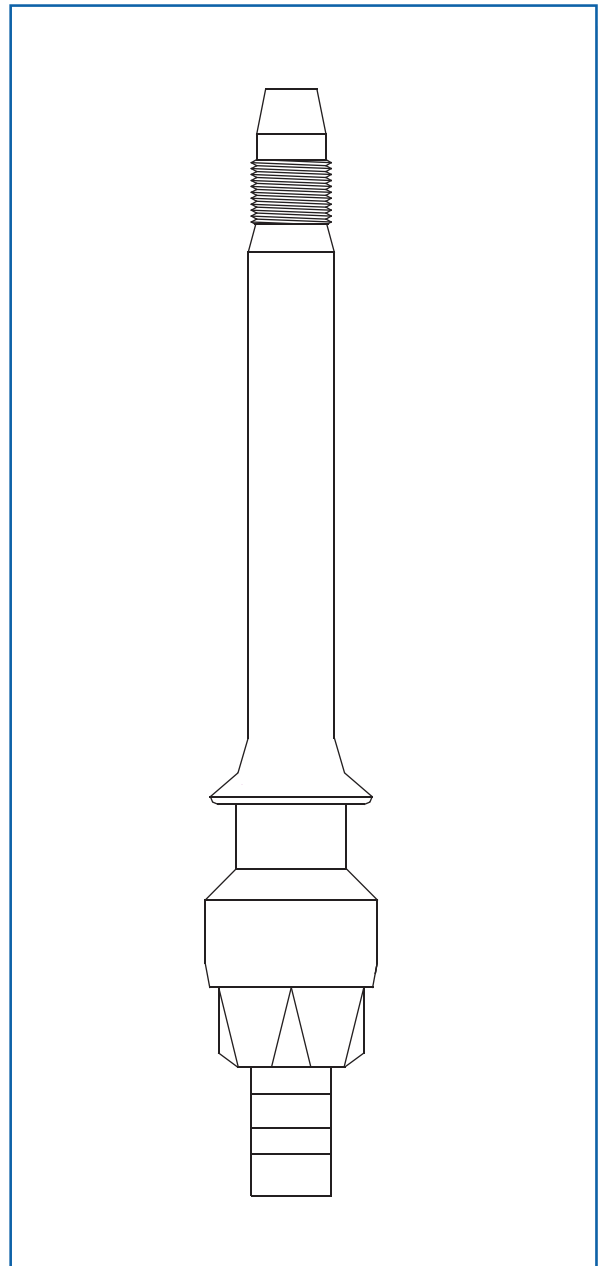

- 316 Stainless steel construction (models to N.A.C.E. MR 0175 available).
- Leak free seal.
- Up to 4 adjustable lengths.
- Overall lengths range from 4.00" to 4.260"

GENERAL DESCRIPTION:

The Ruelco Adjustable Filler Tube provides a fast and efficient method to change the desired length of a Filler tube on an automatic beverage machine. The patented design incorporates a leak free and fully functional tube, while achieving maximum production.

The unique design allows the operator to turn and pull the tube to the desired height within seconds, without removing it from the Filler Valve. This saves time and also eliminates the likelihood of a stripped thread while changing tube sizes.

The Filler tube can be adjusted to as many as four different lengths of varying ranges. The all Stainless Steel construction ensures a long operating life.
